AML ABDELRHMAN ABDELHADY ELSAYED

Full-Stack Developer | React.js · Next.js · TypeScript | Laravel · PHP

amlabdelrhman960@gmail.com +20 101 948 4346 Mansoura, Egypt LinkedIn GitHub

PROFESSIONAL SUMMARY

Full-Stack Developer with 2 years of hands-on experience delivering production-ready applications end-to-end, from Laravel/PHP and Supabase/PostgreSQL backends to React.js/Next.js and TypeScript frontends. Independently designed and built two complete bilingual Arabic/English platforms for Saudi clients, a heritage & genealogy platform and a car-maintenance services platform with full customer and admin dashboards, covering order tracking, payments and notifications, alongside frontend-focused real estate and e-commerce platforms built with Next.js and TypeScript. Comfortable owning the full pipeline: relational database design, REST API development, authentication/authorization, role-based dashboards, state management (Zustand, TanStack Query), and CI/CD deployment (Vercel + Railway). Transitioned professionally from Veterinary Medicine, bringing strong analytical thinking and independent problem-solving capabilities.

TECHNICAL SKILLS

Languages:	HTML5, CSS3, SCSS (Sass), JavaScript (ES6+), TypeScript, PHP
Frontend:	React.js, Next.js (App Router), TanStack Router, React Router, Framer Motion
Backend:	Laravel, Eloquent ORM, RESTful API Design, Laravel Sanctum (Auth), Role-Based Access Control, Payments & Notifications, MVC Architecture, MySQL
State & Validation:	Zustand, Redux, React Query / TanStack Query, Context API, React Hook Form, Zod
Styling & UI:	Tailwind CSS, Bootstrap, Atomic Design, WCAG 2.1 / ARIA, Dark/Light Mode, Admin Dashboards
Databases & BaaS:	MySQL, PostgreSQL, MongoDB, Supabase (BaaS)
DevOps & APIs:	Git, GitHub Actions (CI/CD), Vercel, Railway, REST API, Axios, Cloudinary
SEO & i18n:	JSON-LD Structured Data, Dynamic Metadata, Open Graph, next-intl, i18next, RTL/LTR

WORK EXPERIENCE

Freelance Full-Stack Developer

January 2024 – Present | Remote

- Designed and built full-stack platforms across heritage/genealogy, automotive services, real estate, and e-commerce sectors, using Laravel/MySQL and Supabase/PostgreSQL backends with Next.js/TypeScript frontends, implementing role-based customer and admin dashboards, multilingual content management, and auth-scoped REST endpoints.
- Built end-to-end business workflows including order management and tracking, online payments, and admin-driven notifications, delivering complete customer-facing and back-office experiences for production clients.
- Architected and deployed production-grade web applications utilizing code-splitting, lazy loading, Image Optimization, SSR, and SSG — achieving 30% faster page loads and Lighthouse performance scores consistently at 95+.
- Designed scalable state management architectures separating client and server state with Zustand and React Query (TanStack Query); integrated REST APIs via Axios with robust error handling, reducing redundant API calls by 40%.
- Engineered type-safe form systems with React Hook Form + Zod schema validation across complex multi-step workflows, eliminating runtime form errors by enforcing strict schema contracts.
- Optimized SEO using JSON-LD Structured Data, Dynamic Metadata, Open Graph tags, and semantic HTML within Next.js App Router — achieving 15% organic traffic growth across client web projects.
- Automated CI/CD deployment pipelines using GitHub Actions, deploying frontends on Vercel and Laravel backends/databases on Railway, enabling zero-downtime production releases and maintaining a 95% UI bug-fix rate.
- Delivered multilingual (i18n) applications with next-intl and i18next, including full Arabic/English RTL layout support and Dark/Light mode theming.

KEY PROJECTS

Al-Ammar Family Heritage — Heritage & Genealogy Platform

Full-Stack (Solo)

Bilingual Arabic/English Platform

Laravel | PHP | MySQL | Next.js | TypeScript | Tailwind CSS | i18n (AR/EN, RTL) | Vercel

Live: alammar.family Frontend Repo Backend Repo

- Independently designed, developed, and deployed the entire platform end-to-end — both the Laravel/PHP backend and the Next.js/TypeScript frontend — for a prominent Saudi family's heritage and genealogy archive.
- Built a fully bilingual (Arabic/English) RTL-aware interface with custom Navbar, Hero, and lineage/history sections using Tailwind CSS and clamp-based responsive sizing.
- Owned full API design, database schema for multilingual heritage content, and managed the complete deployment pipeline on Vercel.

The 1st Avenue — Real Estate & Architecture Platform

Frontend Developer

Next.js | TypeScript | Tailwind CSS

Live Demo GitHub Repo

- Built the complete frontend for a real estate and architectural development platform, including dynamic project listing and project-detail pages.
- Implemented responsive, RTL-ready UI components to present property and project data in a mobile-first, high-performance interface.

CarsLink — Car Maintenance Services Platform (Saudi Arabia)

Full-Stack (Solo)

Laravel | PHP | MySQL | Next.js | TypeScript | Tailwind CSS | i18n (AR/EN, RTL) | REST API | Monorepo

Live: carslink.sa GitHub Repo (Frontend + Backend)

- Independently designed, developed, and deployed a complete bilingual (Arabic/English) car maintenance platform for the Saudi market, covering both the Laravel/PHP backend and the Next.js/TypeScript frontend in a single monorepo.
- Built a full customer dashboard for booking maintenance services, tracking order progress, and completing payments.
- Built a full admin dashboard to manage the entire platform, including orders, content, and users, with a notifications system to keep customers and admins updated.
- Implemented secure authentication, role-based access (customer/admin), and RTL-aware responsive UI, and owned database design and REST API development end-to-end.

Hemma Real Estate — Real Estate Listings Platform

Frontend Developer

Next.js | TypeScript | Tailwind CSS

Live Demo GitHub Repo

- Developed the full frontend for a real estate listings platform, covering property browsing, search, and detail views.
- Focused on performance optimization and a clean, reusable component architecture for a fast, responsive browsing experience.

August District — E-commerce Storefront

Frontend Developer

Next.js | TypeScript | Tailwind CSS

Live Demo GitHub Repo

- Built the complete frontend for an e-commerce storefront, including category-based product browsing, keyword search, price-range filtering, and paginated product listings.
- Implemented dynamic, query-parameter-driven product pages for a smooth, SEO-friendly shopping experience.

EDUCATION & CERTIFICATIONS

Bachelor of Veterinary Medicine — Mansoura University, Egypt | 2018–2022

Certification: Responsive Web Design — freeCodeCamp (2024) | **Languages:** Arabic (Native), English (Proficient B2–C1)
