PROFESSIONAL SUMMARY

Results-driven Frontend Developer with 1+ year of hands-on experience building high-performance, accessible web applications using React.js, Next.js (App Router), and TypeScript. Delivered measurable results across 10+ production applications: 30% faster page load times, consistent Lighthouse scores of 95+, and 15% organic traffic growth through advanced SEO. Expert in scalable state management (Zustand, React Query / TanStack Query), CI/CD automation (GitHub Actions), type-safe form handling (React Hook Form + Zod), Atomic Design component architecture, and pixel-perfect Figma-to-code implementation. Proven collaborator with UI/UX designers and backend engineers in Agile and Scrum environments. Career transition from Veterinary Medicine demonstrates strong self-motivation, rapid skill acquisition, and disciplined analytical problem-solving.

TECHNICAL SKILLS

Languages: HTML5, CSS3, SCSS (Sass), JavaScript (ES6+), TypeScript

Frameworks and Libraries: React.js, Next.js, Redux, Zustand, React Query (TanStack Query), TanStack Router, React Router, Context API, Framer Motion, Tailwind CSS, Bootstrap

Forms and Validation: React Hook Form, Zod

Testing: Jest, React Testing Library (RTL), Mocha, Enzyme

State Management: Redux, Zustand, React Query, TanStack Query — scalable client and server state architectures

API and Backend Integration: REST API, Axios, Fetch API, JSON, MongoDB, Supabase (BaaS), PostgreSQL

Design and Collaboration: Figma (design-to-code, pixel-perfect implementation), UI/UX cross-functional collaboration

Tools and Build Systems: Git, GitHub, GitHub Actions (CI/CD), Vite, Webpack, Chrome DevTools, Vercel

Architecture and Best Practices: Atomic Design, Component-Based Architecture, SPA, SSR, SSG, Responsive Design, Mobile-First, Web Performance Optimization, Accessibility (WCAG 2.1 / ARIA), SEO (Structured Data / JSON-LD, Dynamic Metadata, Semantic HTML), Internationalization (i18n / next-intl), Dark/Light Mode, Agile, Scrum

WORK EXPERIENCE

Frontend Developer — React.js and Next.js

Independent Projects and Client Work | January 2024 – Present | Remote

- Architected and deployed 10+ production-grade web applications across e-commerce, real estate, and education sectors using React.js, Next.js, TypeScript, and Tailwind CSS; applied code splitting, lazy loading, Next.js Image Optimization, SSR, and SSG to achieve 30% faster page loads and consistent Lighthouse performance scores of 95+.
- Designed scalable state management architectures separating client and server state using Zustand and React Query (TanStack Query); integrated RESTful APIs via Axios with robust error handling and loading state management, improving UI responsiveness across all projects.
- Engineered type-safe form systems with React Hook Form and Zod schema validation, delivering real-time feedback across complex multi-step workflows and reducing form-related bugs by enforcing strict schema contracts.
- Optimized SEO using Structured Data (JSON-LD), Dynamic Metadata, Open Graph tags, and semantic HTML within Next.js App Router, achieving 15% organic traffic growth and top Lighthouse SEO scores across all Next.js projects.
- Collaborated with UI/UX designers via Figma to translate wireframes and prototypes into pixel-perfect, WCAG 2.1-accessible components; applied Atomic Design principles to build reusable component libraries, accelerating development velocity across teams.
- Automated CI/CD deployment pipelines using GitHub Actions, enabling zero-downtime production releases; maintained ARIA accessibility compliance achieving a 95% UI bug fix rate.

- Delivered multilingual (i18n) applications using next-intl with Dark/Light mode theming; operated in Agile/Scrum environments using Git and GitHub for version control and collaborating with cross-functional backend engineering teams.

PROJECTS

Business Pioneers Solution | Monafis Challenge — Year: 2026 [Live Demo](#) [GitHub](#)

Tech Stack: *React.js | TypeScript | Tailwind CSS | Supabase | PostgreSQL*

- Achievement: Ranked 2nd Place out of numerous participants in the "Business Pioneers Holding" hackathon hosted by Monafis.
- Award: Honored with the "Best UI/UX Design" award for creating a high-end, production-grade dashboard.
- Full-Stack Architecture: Engineered a comprehensive B2B SaaS solution utilizing React and Supabase, ensuring secure PostgreSQL data management and real-time synchronization.
- Frontend Excellence: Developed a high-performance SPA with Tailwind CSS, featuring advanced interactive charts and a sophisticated "Deep Dark" theme.

Alshefaa – Full-Stack HealthTech Platform — Year: 2026 [Live Demo](#) [GitHub](#)

Tech Stack: *React 19 | TypeScript | TanStack Router | TanStack Query (v5) | Zustand | Supabase | PostgreSQL | GitHub Actions | Vercel*

- Architecture: Built a scalable Single Page Application (SPA) using React 19 and TypeScript, achieving near-instant navigation with TanStack Router.
- Full-Stack Integration: Leveraged Supabase as a Backend-as-a-Service (BaaS) to manage complex relational data (PostgreSQL) and real-time medical record updates.
- State Management: Optimized data fetching and caching using TanStack Query (v5) and global state handling with Zustand.
- SaaS Features: Developed an end-to-end medical system including Electronic Health Records (EHR), appointment scheduling, and a specialized medical marketplace.
- DevOps: Established a CI/CD pipeline with GitHub Actions to keep the database active and ensure automated deployments on Vercel.

ETech — Educational Platform — Year: 2026 [Live Demo](#) [GitHub](#)

Tech Stack: *Next.js | TypeScript | Tailwind CSS | React Query | Zustand | Framer Motion | next-intl | Jest | React Testing Library*

- Architected a multilingual SSR educational platform with Next.js App Router; implemented Dynamic Metadata and JSON-LD Structured Data for SEO, achieving 95+ Lighthouse scores across all pages.
- Reduced redundant API calls by 40% through intelligent React Query cache invalidation with Zustand for client-side state; integrated Framer Motion animations from Figma prototypes.
- Achieved 80%+ code coverage on core modules through unit and integration testing with Jest and React Testing Library.
- Automated CI/CD deployment via GitHub Actions; built pixel-perfect, WCAG-compliant components following Atomic Design architecture.

Hemma — Real Estate Portal — Year: 2026 [Live Demo](#) [GitHub](#)

Tech Stack: *Next.js | TypeScript | Tailwind CSS | Framer Motion | next-intl | React Query*

- Built a multilingual property portal with SSR pages, advanced search and filter functionality, and React Query data caching, delivering 30% faster page load times.
- Optimized SEO with Dynamic Metadata, JSON-LD property schema, and semantic HTML in Next.js, contributing to 15% organic traffic growth.
- Implemented pixel-perfect Framer Motion animations from Figma prototypes, ensuring design fidelity across all device sizes.

August District — E-commerce Storefront — Year: 2026 [Live Demo](#) [GitHub](#)

Tech Stack: *Next.js | TypeScript | Tailwind CSS | Axios | React Hook Form | Zod | next-intl | React Query*

- Developed a multilingual SSR/SSG storefront with dynamic product filtering, shopping cart, and REST API integration; achieved consistent 95+ Lighthouse scores with mobile-first responsive design.

- Engineered complex checkout forms with React Hook Form and Zod validation, eliminating runtime form errors and improving submission success rate.
- Built a reusable Atomic Design component library from Figma designs, accelerating feature development and ensuring UI consistency across the product catalog.

WarmDecor — Interior E-commerce Store — Year: 2026 [Live Demo](#) [GitHub](#)

Tech Stack: *Next.js* | *TypeScript* | *Tailwind CSS* | *React Query* | *Axios*

- Optimized product listings using Next.js Image Optimization and React Query caching, achieving 30% faster load times on product-heavy pages.
- Implemented dynamic product filtering and shopping cart with clean state management and full REST API integration.

EDUCATION

Bachelor of Veterinary Medicine

Mansoura University, Egypt | 2018 – 2022 | Grade: Very Good

Science background reflects strong analytical thinking, self-directed learning, and the discipline to master complex technical systems independently.

CERTIFICATIONS

Responsive Web Design Certification | freeCodeCamp | 2024

LANGUAGES

Arabic: Native | **English:** Proficient (B2-C1)
